HARDWOOD FLOOR COLLECTION

Add beauty to your home with elegant hardwood.

Engineered hardwood flooring is real hardwood – engineered simply refers to the way it is produced.

There are many benefits to choosing engineered hardwood:

- Engineered flooring has several layers or “plies” glued together in a cross-grain construction.
- Far stronger than a single piece of solid wood and it is also more structurally sound – it won’t buckle, gap, cup or twist.
- Can be installed below grade and direct to concrete – solid wood floors cannot.
- Top layer is crafted from the finest northern veneers that provide the most uniform colour and the most resistance to seasonal expansion.

Engineered hardwood is environmentally friendly:

- Use half as many trees as solid wood floors.
- Faster growing, renewable wood is used for inner plies.
- Our wood facility reuses the mill waste for energy.
- Formaldehyde-free adhesive system that meets or beats the most stringent air quality standards.

CASA engineered hardwood is

- Easy care and maintenance.
- Unrivalled beauty.

HARDWOOD FLOOR COLLECTION

Our beautiful wood flooring collections gives the look of real timber in a variety of colours and designs – adding warmth and texture. Exceptional decorative colours.
